Professional Experience

○ Plutonic Services | Frontend Developer

August 2021 - April 2023

I worked here on user interface development using React JS, JavaScript & CSS. It's a service based company. Here, I worked on these projects.

- **ERP System**

This project has several modules including HR, Employee Management, Account & Leave Management.

- **Crunch Munch & Freyr Foods**

Both are e-commerce sites developed in ReactJS and Ant Design. Both have more than 5 modules including authentication

- **NIX HRMS**

We have created this project from scratch in React Js and Ant Design components. It consumes backend APIs to show dynamic data. This web application helps companies to create and run in-house ERP systems.

○ Birbals Inc. | Frontend Developer

June 2023 - July 2024

I worked here on user interface development using HTML & CSS. It's a product based company. Here, I worked on these projects.

- **IN WILL WE TRUST**

Mainly i've worked on this project on frontend part, and created this project on html and css.

- **DSET Public School**

In this project i've created many pages in html and css.

- **Radio Zindagi**

This project is on wordpress. I've made few changes in this project and created Ganesh Utshav page.

- **Birbals**

This site is re-designed and mainly i've created mostly pages using html and css.

Personal Work

- **OmniFood | code**

This is a static site for food restaurant implimented in plain HTML and CSS.

- **Todo App | code**

Created this App using react js and Ant design.

- **Pexel clone | code**

Created this App using react js and fetching the data from API.

- **Shopee | code**

Created this App using react js and used Redux for state managment.
